SUBJECT INDEX

Adrenocortical cells
  effects of joining peptide and histamine on dehydroepiandrosterone and dehydroepiandrosterone sulphate production of human, *in vitro*, 207
Adrenocortical lipids
  viscosity of rat, in different functional states: morphological characteristics, 329
Aldosterone
  role of calmodulin-dependent protein kinase II in the acute stimulation of, production, 417
Androgen(s)
  molecular basis of, insensitivity, 569
  receptor(s)
    autoregulation of, protein and mRNA in rat ventral prostate, 539
    quantification of, mRNA in tissues by competitive coamplification of a template in reverse transcription-polymerase chain reaction, 563
Anti-aromatase(s)
  effect of an, CGS 20267, in guinea pig brain, 411
  inhibitory effects of YM511, a novel non-steroidal, on the proliferation of MCF-7 human breast cancer cells, 189
  4-oxygenated androst-5-en17-ones and their 7-oxo derivatives, 431
  preclinical pharmacology of Arimidex (Anastrozole; ZD1033), as a potent and selective, 439
Anti-progestin(s)
  activity of, in a rat mammary primary cell culture system, 117
Aromatase
  inhibition of, activity by nitrogen oxide, 63
  role of, in brain differentiation and functions, 455
Aromatase mRNA
  effect of an, CGS 20267, in guinea pig brain, 411
  existence and expression of the untranslated first exon of, in the rat brain, 163

Brain
  effect of an aromatase inhibitor, CGS 20267, in, of guinea pig, 411
  existence and expression of the untranslated first exon of aromatase mRNA in the, of rat, 163
  interactions of androgenic/anabolic steroids with the peripheral benzodiazepine receptor in, of rat, 551
  metabolism of steroids in, differentiation and functions, 455
Breast cancer
  depletion of estrogen receptor in human, cells by a novel substituted indole, 21
  1,25-dihydroxyvitamin D_3 induces morphological and biochemical markers of apoptosis in MCF-7, cells, 367
  effect of nomegestrol acetate on estrone-sulfatase and 17β-hydroxysteroid dehydrogenase activities in human, cells, 525
  effects of sex- and glucocorticoid-steroids on, cells, 13
  estrogen receptor and epidermal growth factor receptor gene expression in MCF-7, cells, 267
  inhibitory effects of a novel non-steroidal aromatase inhibitor, YM511, on the proliferation of MCF-7 human, cells, 189
  intratumour amount of sex steroids in elderly patients with, 557

Cytochrome P-450c17
  kinetic analysis of duodenal and testicular, in the rat, 577
  side-chain cleavage of cholesterol esters by human, 605

Dehydroepiandrosterone
  induction of lipid peroxidation in rat liver mitochondria by, 599
  in human adrenocortical cells, 207
Dehydroepiandrosterone sulphate
  in human adrenocortical cells, 207

Dexamethasone
coordinate expression of β-galactoside α2,6-sialyltransferase mRNA and enzyme activity in suckling rat jejunum cultured in different media: transcriptional induction by, 289
1,25-Dihydroxyvitamin D_3
effects of, and its analogues on induction of apoptosis in breast cancer cells, 395
induces morphological and biochemical markers of apoptosis in MCF-7 breast cancer cells, 367
1α,25-Dihydroxyvitamin D_3
vitamin D receptor expression is required for growth modulation by, in the human prostatic carcinoma cell line ALVA-31, 277
Diphenylethylenediamine platinum complex
effects of a, on steroidogenesis in rats, 243

Endometrial adenocarcinoma cell line RUCA-I
a novel hormone-responsive tumor model, 103
Endometrial stromal cells
progestin regulation of interleukin-8 mRNA levels and protein synthesis in human, 71
Epidermal growth factor
receptor
gene expression in MCF-7 breast cancer cells, 267
Estrone sulfatase
effect of nomegestrol acetate on, in human breast cancer cells, 525
evidence of *in situ* estrogen synthesis in nitrosomethylurea-induced rat mammary tumors via, 425
Estrone-3-O-sulphamate
pharmacokinetics of, 611
Estrogen(s)
receptor(s)
analysis of tamoxifen-stimulated human carcinomas for mutations in the AF-2 region of, 479
characterization of pure, hormone binding domain, 467
depletion of, in human breast tumor cells by a novel substituted indole, 21
footprint analysis of, binding to adjacent estrogen response elements, 45
generation of, mutants with altered ligand specificity for use in establishing a regulatable gene expression system, 3
influence of blockers for the, in rat uterus, 359
in rat coronary artery smooth muscle cells, 83
interactions between nuclear receptors at, response elements, 507
inverse regulation of, in MCF-7 breast cancer cells, 267
2-phenylindoles with sulfur containing side chains: affinity of, 31
Estrogen response element(s)
footprint analysis of estrogen receptor binding to adjacent, 45

Gene expression system
generation of estrogen receptor mutants with altered ligand specificity for use in establishing a regulatable, 3
Glucocorticoid(s)
effects of, on breast cancer cells, 13
receptor(s)
ability of various members of the hsp70 family to promote assembly of the, into a functional heterocomplex with hsp90, 251
differential binding of mutant, to the glucocorticoid response element of the tyrosine aminotransferase gene, 147
Glucocorticoid response element
differential binding of mutant glucocorticoid receptors to the, of the tyrosine aminotransferase gene, 147
Growth factor(s)
effect of, on estrogen receptor mediated gene expression, 385
Growth hormone
the pattern of testosterone replacement influences the recovery of the stimulatory effect of clonidine on, secretion in orchidectomized rats, 533

21-Hydroxylase
pituitary-adrenocortical function in abdominal obesity of males: evidence for decreased, activity, 123
3β-Hydroxysteroid dehydrogenase
physiologic 3β-hydroxy-5-ene steroid substrates bind to, without the prior binding of cofactor, 211

11β-Hydroxysteroid dehydrogenase type 1 mRNA
expression of, in the interconversion of cortisol and cortisone in the baboon placenta, 403
17β-Hydroxysteroid dehydrogenase
in human breast cancer cells: effect of nomegestrol acetate, 525
3β-Hydroxysteroid dehydrogenase-isomerase
effects of trilostane and cyanoketone on the, reactions in the pig testis, 95
3α-Hydroxysteroid oxidoreductase
activities in dihydrotestosterone degradation and back-formation in rat prostate and epididymis, 319
Hypothalamic function
steroidal substances active in the human vomeronasal organ affect, 1

ICI 164,384
Effects of, on protein synthesis and vectorial secretion in polarized rat uterine epithelial cells, 307
Inhibin
immunoreactive, concentration in blood tested under variable sampling conditions, 325
Insulin Growth Factor
type-I, receptor in the rat uterus, 359
Interleukin-8 mRNA
progestin regulation of, in human endometrial stromal cells, 71

Leydig cells
effects of acute and chronic immobilization stress on rat, steroidogenesis, 351
LNCaP prostate tumour
intermittent androgen suppression delays progression to androgen-independent regulation of prostate specific antigen gene in the, model, 139

Mineralocorticoid(s)
receptor(s)
human, gene promoter: its structure and expression, 495

Nitric oxide
inhibition of aromatase activity by, 63
Nitrosomethylurea-induced rat mammary tumors
evidence of *in situ* estrogen synthesis in, via estrone sulfatase, 425
Nomegestrol acetate
effect of, on estrone sulfatase and 17β-hydroxysteroid dehydrogenase activities in human breast cancer cells, 525
Nuclear receptors
interactions between, at estrogen response elements, 507
taxonomy of, and serpins by multivariate analysis of amino-acid composition, 167

Placenta
interconversion of cortisol and cortisone in the, of baboon at mid-gestation: expression of 11β-hydroxysteroid dehydrogenase type 1 mRNA, 403
Pregnancy
identification of novel steroid *N*-acetylglucosaminides in the urine during, in women, 585
Progesterone
activity of, and anti-progestins in a rat mammary primary cell culture system, 117
receptor(s)
demonstration of, in rat Schwann cells, 77
hormone-dependent changes in A and B forms of, 517
Progesterone 11α-hemisuccinate-(2[^{125}I]-iodohistamine)
estrogen-specific target site identified by, in mouse brain membranes, 89
Prostate adenocarcinoma cells
characterization of type I 5α-reductase activity in DU145 human, 195
vitamin D receptor expression is required for growth modulation by 1α,25-dihydroxyvitamin D_3 in the human, ALVA-31, 277
Prostatic cells
testosterone metabolic profile in, 235
Proteins
sex-hormonal regulation of 20.5 and 24 kDa major male-specific, in Syrian hamster submandibular gland, 183

Receptor(s)
androgen(s)
autoregulation of, protein and mRNA in rat ventral prostate, 539
quantification of, mRNA in tissues by competitive coamplification of a template in reverse transcription-polymerase chain reaction, 563
epidermal growth factor
gene expression in MCF-7 breast cancer cells, 267
estrogen(s)
analysis of tamoxifen-stimulated human carcinomas for mutations in the AF-2 region of, 479
characterization of pure, hormone binding domain, 467
depletion of, in human breast tumor cells by a novel substituted indole, 21
footprint analysis of, binding to adjacent estrogen response elements, 45
generation of, mutants with altered ligand specificity for use in establishing a regulatable gene expression system, 3
influence of blockers for the, in rat uterus, 359
in rat coronary artery smooth muscle cells, 83
interactions between nuclear receptors at, response elements, 507
inverse regulation of, in MCF-7 breast cancer cells, 267
2-phenylindoles with sulfur containing side chains: affinity of, 31
glucocorticoid(s)
ability of various members of the hsp70 family to promote assembly of the, into a functional heterocomplex with hsp90, 251
differential binding of mutant, to the glucocorticoid response element of the tyrosine aminotransferase gene, 147
insulin growth factor
type-I, in rat uterus, 359
mineralocorticoid(s)
human, gene promoter: its structure and expression, 495
nuclear
interactions between, at estrogen response elements, 507
taxonomy of, and serpins by multivariate analysis of amino-acid composition, 167
progesterone
demonstration of, in rat Schwann cells, 77
hormone-dependent changes in A and B forms of, 517
steroid(s)
evidence for, in the functionality of the human vomeronasal organ, 259
vitamin D
expression of, in growth modulation by 1α,25-dihydroxyvitamin D_3 in the human prostatic carcinoma cell line ALVA-31, 277
5α-Reductase
characterization of type I, activity in DU145 human prostatic adenocarcinoma cells, 195
effects of FCE 28260, a new, inhibitor, 299
MK386: a potent, selective inhibitor of the human type 1, 377
role of, in the brain, 455
RU-486
effects of food deprivation and adrenalectomy on CYP3A induction by, in female rats, 447

Sex steroid(s)
intratumour amount of, in elderly breast cancer patients, 557
Shionogi tumors
large, lose their responsiveness to flutamide treatment, 489
Steroid(s)
antibiotic resistance and enhanced insecticide catabolism as consequences of, induction in the gram-negative bacterium *Comamonas testosteroni*, 217
identification of novel, *N*-acetylglucosaminides in the urine of pregnant women, 585
microbial transformations of, - cytochromes P-450 11α-hydroxylase and C17–C20 lyase and a 1-ene dehydrogenase transform, in *Nectria haematococca*, 337
receptor(s)
evidence for, in the functionality of the human vomeronasal organ, 259

synthesis,
facile, of [16,16,17-$^2H_3$]-testosterone, -epitestosterone and their glucuronides and sulfates, 225
Steroidogenesis
effects of adiphenylethylenediamine platinum complex on, in rats, 243
effects of acute and chronic immobilization stress on rat Leydig cell, 351
Submandibular gland
sex-hormonal regulation of 20.5 and 24 kDa major male-specific proteins in, of Syrian hamster, 183

Tamoxifen
analysis of, -stimulated human carcinomas for mutations in the AF-2 region of the estrogen receptor, 479
effects of, on protein synthesis and vectorial secretion in polarized rat uterine epithelial cells, 307
Tyrosine aminotransferase gene
differential binding of mutant glucocorticoid receptors to the glucocorticoid response element of the, 147

Vitamin D
receptor(s)
expression of, in growth modulation by 1α,25-dihydroxyvitamin D_3 in the human prostatic carcinoma cell line ALVA-31, 277
Vomeronasal organ
functionality of the human, and evidence for steroid receptors, 259
steroidal substances active in the human, affect hypothalamic function, 1

We would like to express our deep thanks to the following persons for their kind collaboration in reviewing papers for *The Journal of Steroid Biochemistry & Molecular Biology:*
